

## WHAT IS CLAIMED IS:

1. An accelerator pedal comprising:  
a stopper member attached to a floor of a driver's seat  
5 of a vehicle;  
a pad member to be fitted against the stopper member and  
having a pad for receiving a depression force exerted by a driver;  
an arm which is engaged with the pad member and transmits  
the depression force; and  
10 a bracket which is engaged with the arm and supports the  
arm;  
wherein the pad member is provided with a stopper fitting  
section by which the pad member is fitted against the stopper  
member, and the stopper member is provided with a pad fitting  
15 section into which the stopper fitting section is fitted, wherein  
a hinge section is provided for connecting the pad to the stopper  
fitting section, and wherein the pad member is made of resin.
2. An accelerator pedal according to claim 1, wherein  
20 the pad, the hinge section, and the stopper fitting section  
are integrally molded by a single resin material.
3. An accelerator pedal according to claim 1 or 2,  
wherein the pad, the hinge section, and the stopper fitting  
25 section are made of soft polyester elastomer.
